**Generating Set SUPERSILENT - Diesel** 

# GE.VO.150/135.SS+011

1500 rpm - Threephase - 50Hz - 400V Automatic panel without switching on board

# Standard equipment

# Canopy Soundproofing

Removable soundproof canopy Painting canopy (RAL) in galvanized sheet steel Soundproofing with class 1 polyester material Handles with key lock and automatic closing Special baffles for air intake and air expulsion Inspection doors for controls and maintenance

# Exhaust

Exhaust rain cap Exhaust manifold protection Insulated exhaust pipes Internal residential muffler - 35dB(A)

# Fuel Supply

Single wall daily tank with bunded base Automatic shutdown system for low fuel level Fuel gauge

## THANGLING

Lifting hook integrated into the bearing structure Base frame with anti-overturning forklift pockets

## Base Frame

Bunded base at 110% of fuel tank capacity Anti-vibrating mounting pads Battery compartment externally accessible for easy service

### Engine

Engine pre-heater 230V

High coolant temperature and low oil pressure shutdown

Oil pressure and coolant temperature gauge (only with QPE or +14 variant)

External oil drain points

Engine liquids (oil and antifreeze)

Tropicalized radiator

Rotating parts protection

Electronic speed governor

Radiator level sensor

## Alternator

**AVR Automatic Voltage Regulator** Impregnation for marine environment IP23

## Panel & connection

**Emergency Stop button** Non-Automatic circuit breaker on panel board Tamperproof panel IP55 Cable output from side IP44 wiring Start-up battery (pre-charged) Grounding point

# **QPE** Automatic panel without switching on board

The QPE-C control panel represents the evolution of the panel for the control and management of the gen set. With its microprocessor logic it is able to meet any user requested features. The dual operation mode manual and automatic guarantees to every type of functionality protection, analysis and control of the generating set in order to make the management easy and efficient. Variant without transfer switch on board. ATS panel type QC as optional. The panel manages the QC panels directly or any other ATS panel.

### **PRP**

Engines of this rating provide unlimited hours of usage in a variable load application. The average load factor should not exceed 70% of the engine's prime power rating with a maximum number of 500 operational hours at 100% prime power rating. An overload capability of 10% is available, however, is limited to a period of 1 in every 12 hours

### **LTP**

Limited-time running power is defined as the maximum power available, under the agreed operating conditions, for which the generating set is capable of delivering for up to 500h of operation per year with the maintenance intervals. The overload is not allowed.
